

## CONNECT TO JSTOR

Οι παρακάτω οδηγίες παραχωρήθηκαν στους/στις φοιτητές/τριες του Αγγλόφωνου Μεταπτυχιακού Αρχαιολογίας.

In order to connect to JSTOR (and also connect to any other service that requires authentication by the UoA), you have to first connect to the VPN of the University. You need to download one of the following files and install it on your computer, depending on your OS:

Windows: <http://www.noc.uoa.gr/syndesh-sto-diktyo/eikoniko-idiwtiko-diktyo-vpn/windows.html>

Apple: <http://www.noc.uoa.gr/syndesh-sto-diktyo/eikoniko-idiwtiko-diktyo-vpn/apple-macos-x.html>

Linux: <http://www.noc.uoa.gr/syndesh-sto-diktyo/eikoniko-idiwtiko-diktyo-vpn/linux.html>

Android: <http://www.noc.uoa.gr/syndesh-sto-diktyo/eikoniko-idiwtiko-diktyo-vpn/android.html>

After you install the application, you'll have a new icon in your taskbar (bottom right). Click on the icon and then enter your username (the one you use for your email, but without the @arch.uoa.gr) and your email password. Then you'll be connected in the VPN of the University. Just visit jstor and it'll recognize that your IP is part of the University network. You can check your connection here: <http://checkip.noc.uoa.gr/>

### **Attention!**

**Please keep in mind to connect to the vpn only when you need to access a service and then disconnect again. Otherwise, all your internet traffic is going to get through the University servers!**
