Nancy Alonistioti

Institution: National and Kapodistrian University of Athens

Professor Nancy Alonistioti has a PhD in Computer Science and Telecommunications and has over 20 years of experience in various national and European projects. She currently leads the SCAN team activities at the Department of Informatics, NKUA. Professor Alonistioti has served on the steering committee of the Future Internet Assembly and has undertaken administrative activities in several projects. She is a member of the ETSI expert group and the Greek ELOT standardization group. She has published more than 100 papers in the field of mobile networks, future Internet/NGI, cognitive management, autonomic communications, and reconfigurable mobile systems. Additionally, she is co-author of four WO patents and has received over 2,500 references to her work.

The Seventeen Sustainable Development Goals

The Three Pillars of Sustainable Development Goals

Network Management

Professor: Nancy Alonistioti Undergraduate

Course Outline

The course covers so much ground! On one hand, you'll learn all about the basic models of fixed and wireless/mobile communications management. On the other hand, you'll dive into the exciting world of designing, developing, and evaluating Network Management Systems. But that's not all! You'll also get an introduction to computer network management, management based on the FCAPS model, management system organization, and management platforms. Get ready to expand your knowledge and skills in a big way!

Topics Covered:

- Analysis of the structure of management information
- Categories of managed objects
- Management protocols
- Management Services and the SNMP protocol
- Operational domains and network management functions
- Network management system design methodology
- New network management technologies
- Concepts of self-management
- Cognitive network management
- Heterogeneous communication systems management
- Management issues in mobile and wireless networks
- Future Internet
- Network security management issues

Prepare for an exploration into the fascinating analysis of the structure of management information, categories of managed objects, and management protocols. Operational domains and network management functions will also be covered extensively,

Module SDG Coverage Assessment Tool

Evaluate the extent to which the module addresses the Sustainable Development Goals (SDGs) by entering a score between 0 to 5.

Value	Description
0	No coverage
1	Indirectly or unknowingly including topics related to the SDG
2	Provides insight into the SDG from the perspective of One's Own Discipline
3	Uses inter- or transdisciplinary approach to address at least one SDG Target
4	Assessment of SDG knowledge in relation to module and/or programme Learning Outcomes
5	Uses Action Oriented Pedagogies related to SDGs and/or Community Outreach

SDG 01: No Poverty ○ ○ ○ ○ ○ ○
People 0 1 2 3 4 5

SDG 02: Zero Hunger ○ ○ ○ ○ ○ ○
