Diglossia

	<i>High</i>	<i>Low</i>
<i>Greek</i>	Katharévousa	Dhimotiki (Demotic)
<i>Arabic</i>	'al-fush (Classical)	'al-'ammiyah (Colloquial)
<i>Swiss German</i>	Hochdeutsch (High German)	Schweizerdeutsch (Low German)

Diglossia: An example (Holmes & Wilson, *Intro to Sociolinguistics*)

Diglossia

A linguistic division of labour

Example 6

In Eggenwil, a town in the Aargau canton of Switzerland, Silvia, a bank-teller, knows two very distinct varieties of German. One is the local Swiss German dialect of her canton which she uses in her everyday interactions. The other is standard German which she learnt at school, and though she understands it very well indeed, she rarely uses it in speech. Newspapers are written in standard German, and when she occasionally goes to hear a lecture at the university it may be in standard German. The national TV news is broadcast in standard German, but weather broadcasts now use dialect. The sermons her mother listens to in church are generally in standard German too, though more radical clerics use Swiss German dialect. The novels Silvia reads also use standard German.

Ferguson's definition

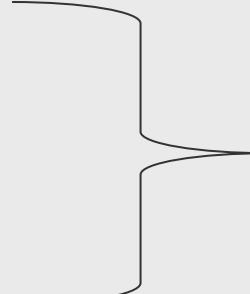

- » *DIGLOSSIA is a relatively stable language situation in which, in addition to the primary dialects of the language (which may include a standard or regional standards), there is a very divergent, highly codified (often grammatically more complex) superposed variety, the vehicle of a large and respected body of written literature, either of an earlier period or in another speech community, which is learned largely by formal education and is used for most written and formal spoken purposes but is not used by any sector of the community for ordinary conversation.*

Charles Ferguson, «Diglossia» (1959)

- » Diglossia (διμορφία, διπλογλωσσία) is narrowly defined by:
 1. Two distinct varieties of the same language are used in the same community: H(igh) – L(ow) Variety; (Υψηλή - Χαμηλή);
 2. a specialization of function for H – L. H and L complement each other;
 3. H is never used in everyday conversation, for casual or informal speech, small talk, etc.

diglossia ≠ standard + dialect
