*(Received 11 August 2006. Revised 25 April 2007)*

---

[\*] We thank Larry Fenson and colleagues for permission to adapt the MacArthur-Bates Communicative Development Inventories to Danish. The data for the cross-sectional study presented in this paper were collected as part of a research project, 'Danish children's language acquisition' (2002–2005), funded by the Carlsberg Foundation and the University of Southern Denmark. Part of the data collection was funded by the Oticon Foundation. We also wish to thank the student assistants and all of the other people who have contributed to data collection and data entry. We also wish to thank all of the parents of the participating children who have completed CDI-parental reports for our studies. Finally, we want to express our thanks to Eva Sophia Myers, Rune N. Jørgensen, Kasper Østerholdt Jensen and Penny Kristiansen for their assistance in the preparation of this paper. Address for correspondence: Dorte Bleses, Center for Child Language, Institute of Language and Communication, University of Southern Denmark, Denmark. Email: bleses@language.sdu.dk.
